

What is claimed is:

1. An additive for hair growing agent shown by the following general formula (I):

wherein,  $\text{R}^1$  is an alkyl group having a carbon number of 1 to 30, an aryl group or a group shown by the formula  $(\text{R}^2)_3\text{SiO}-$  or  $-\text{YO}(\text{C}_2\text{H}_4\text{O})_a(\text{C}_3\text{H}_6\text{O})_b\text{R}^3$ ; at least one of  $\text{R}^1$ 's is an alkyl group having a carbon number of 6 to 30 or a group shown by the formula  $-\text{YO}(\text{C}_2\text{H}_4\text{O})_a(\text{C}_3\text{H}_6\text{O})_b\text{R}^3$ ;  $\text{R}^2$  is an alkyl group having a carbon number of 1 to 5 or an aryl group;  $\text{R}^3$  is a hydrogen atom, an alkyl group having a carbon number of 1 to 6 or an acetoxy group; Y is a divalent organic group bound to an adjacent silicon atom through a carbon-silicon bond and to a polyoxyalkylene block through an oxygen atom; m is a number of 1 to 50 on the average; and a and b are numbers of 0 to 50 on the average respectively, but they satisfy the relationship  $a+b \geq 2$ .

2. An additive for hair growing agent shown by the following general formula (II):

wherein,  $\text{R}^2$  is an alkyl group having a carbon number of 1 to 5 or an aryl group;  $\text{R}^4$  is an alkyl group having a carbon number of 6 to 30 or a group shown by the formula  $-\text{YO}(\text{C}_2\text{H}_4\text{O})_a(\text{C}_3\text{H}_6\text{O})_b\text{R}^3$ ;  $\text{R}^3$  is a hydrogen atom, or an alkyl group having a carbon number of 1 to 6 or an acetoxy group; Y is a divalent organic group bound to an adjacent silicon atom through a carbon-silicon bond and to a polyoxyalkylene block through an oxygen atom; and a and b are numbers of 0 to 50 on the average respectively, but they satisfy the relationship  $a+b \geq 2$ .
